

MediNotes EMR to Interface with Huvitz CDR-Mate

MediNotes e will accept results from the popular Huvitz Auto-Refracting System

July 13, 2006

West Des Moines, Iowa - **MediNotes Corporation**, one of the leading providers of “Best of Breed” electronic medical record (EMR) systems announced today that their EMR, **MediNotes e** will now accept information from the Huvitz CDR-Mate Auto-refracting device.

With the addition of the Huvitz interface to the **MediNotes e** program, physicians will be able to facilitate their exam results and have them flow freely into their EMR. “When we decided to interface our program with ophthalmic devices, we first polled our eye care physicians to determine what devices were being utilized in their clinics. The Huvitz device was a popular design and we are pleased to bring this technology to our Optometry and Ophthalmology physicians,” stated Donald G. Schoen, CEO & President, MediNotes Corporation.

Through this interface, physicians are able to perform their auto-refracting exams on the Huvitz device and have their results match the objects housed within **MediNotes e**.

About MediNotes Corporation

MediNotes Corporation is a leader in electronic medical record solutions for primary care and specialty medical practices and currently serves more than 3,600 installed sites and more than 9,000 users nationwide.
