

MediNotes Corporation Welcomes over 220 MediNotes e Users to Annual Conference

West Des Moines, IA - (June 26, 2007) – MediNotes Corporation, a leading provider of electronic medical record (EMR) systems for primary care and specialty medical practices is pleased to announced the successful conclusion of their 3rd Annual MediNotes User Group Conference. The theme of this year's conference was *Getting it Right the First Time*, and included MediNotes e training sessions, dedicated peer-to-peer networking and the always popular Question and Answer session with MediNotes staff.

The Westin O'Hare in Chicago played host to over 220 MediNotes e users the weekend of June 22nd and kicked off with a presentation by Mr. C. Keith Greer, Esq., a California based attorney who specializes in the interests of medical professionals. Mr. Greer's presentation, entitled "Greer's Anatomy: sharp and blunt dissection of current legal issues impacting medical record keeping," touched on many of the legal issues facing physicians today.

"After the success of our first User Group Conference in 2005, we knew it would be a tradition we would continue for years to come," stated Donald G. Schoen, president and CEO, MediNotes Corporation. "I believe the success of this conference is a true testament to the quality of our program, the dedication of our clients, and the MediNotes staff."

"Our number one goal is, and will continue to be, the success of our clients," continued Schoen. "Having met and talked with many of them at the conference, I am able to get a better understanding of the issues they face on a daily basis, and I believe they are able to recognize some of the struggles we face as well. By working together and continuing to communicate, we will all be successful."

New to the conference this year was MediNotes 101, a basic training session that took place prior to the official start of the conference. Attendance once again exceeded expectations and included over 125 participants.

The 3rd Annual MediNotes User Group Conference welcomed physicians from across the country, representing 21 different medical specialties, which demonstrates the true flexibility of the program.
